POPBOX POS DISPLAY HOLDS 6 UNITS

Baby Foot Easy Pack
 For Soft, Smooth Feet

Directions (Each pair of Sock Packs are for a single use application)

1. After cleansing your feet, put the Sock Packs on both feet and secure the socks around each ankle using the enclosed pieces of adhesive tape.
2. Wear the Sock Packs for one hour to allow product to absorb.
3. After one hour, remove the Sock Packs and wash your feet with soap.
4. The dead skin cells will begin to peel from 2 - 7 days after the initial application.
5. The dead skin cells could continue to peel naturally up to two weeks, depending on the amount of dead skin on the feet, leaving your feet soft and smooth, just like a baby's foot.

1. Remove the 6 Baby Foot units and tear along the perforation.
2. Discard all of the white portions of the box.
3. Fold the top lid to form the display banner.
4. Replace the 6 units into the newly created display.
